

Mission Scoring Framework

CONSTRAINTS

(pass / fail)

Safety

✓ PASS (score = 0.96)

Time

✓ PASS (must be < 300 s)

OPTIMIZED

(continuous 0-1)

Detection

0.93 (w = 0.40)

Coverage

0.96 (w = 0.35)

Energy

0.89 (w = 0.25)

Composite = $0.40 \times \text{Det.} + 0.35 \times \text{Cov.} + 0.25 \times \text{Energy}$

= 0.93

Safety and Time are thresholds, not weights --- you either pass or fail.
